Vertical Post Style Hoists

The new Model T-795 and T-796 Vertical Post Style Hoist (VPSH) from Topos is compatible with all Topos mixer bowls and troughs. The hoist can be customized to accept other bowls and troughs as well. It features a heavy-duty 'I-beam' construction with dump heights to suit customer specifications. The hoist is capable of tilting bowls and/or troughs to the left or right. It has a compact footprint and the hoist is easy to operate - requiring minimal maintenance.

Shown with optional
safety fencing

Standard Features

Compatible with all Topos mixer bowls and troughs. Can be customized to handle other bowls and troughs as needed.

Capable of tilting to the left, the right, or both directions where required.

Fabricated from both stainless steel and mild steel coated in "Steel-It" stainless steel coating.

Built to your height specifications.

Extra heavy-duty 'I-beam' construction for durability and safety.

Options:

- › Left or right combination tilting to feed dough into two lines sitting side by side.
- › Floor mounted fencing around base of hoist for added OSHA protection.
- › Bowl scrapers for all Topos mixer bowls.

Includes safety bowl guard for OSHA compliance. Can be customized with additional fence-type guarding.

Full CE compliant.

Compact footprint.

Lift-up safety guard with electrical interlock as standard.
